

Sania Shahzad

ID: 3440260070282 | **Date of birth:** 28/11/2004 | **Place of birth:** Mandi Bahauddin, Pakistan |
Nationality: Pakistani | **Phone number:** (+92) 3426467218 (Mobile) | **Email address:** shahzadsania3789@gmail.com |
Address: Village Kakowal Tehsil & District Mandi Bahauddin, 50400, Mandi Bahauddin, Pakistan (Home)

ABOUT ME

I am a passionate and goal-oriented undergraduate student with strong academic abilities and a keen interest in continuous learning. I am actively seeking opportunities where I can apply my developing theoretical knowledge and growing practical skills in a professional environment. With strong communication, teamwork, and problem-solving abilities, I am eager to contribute positively while gaining valuable experience to build a strong foundation for my future career.

WORK EXPERIENCE

TUTOR – 01/06/2023 – Current
Address: Village Kakowal Tehsil & District Mandi Bahauddin, 50400
Personalized subject instruction
Academic performance improvement

EDUCATION AND TRAINING

02/10/2023 – CURRENT Gujrat, Pakistan
BS COMPUTER SCIENCE University of Gujrat
Website <https://uog.edu.pk/>

LANGUAGE SKILLS

Mother tongue(s): **URDU**
Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B1	B1	A2	A2	B1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Microsoft Word | Microsoft Powerpoint | Microsoft Excel | Very good oraganization and team leading skills | Web designing & Web development | Team management & team work | Stylesheet Languages | Web Developer | HTML | CSS | Javascript | React js | Tailwind CSS | Full stack Developer | Frontend Developer | node js | mongo DB | Back end Developer

PROJECTS

01/05/2025 – 28/05/2025
Dynamic News Website

Developed a responsive and user-friendly news website using HTML, CSS and JavaScript. The site features dynamic content updates, categorized news sections (e.g., Sports, Politics, Technology), a user-friendly interface, and an admin panel for article management. Implemented basic CRUD operations and ensured mobile responsiveness for various screen sizes.

28/04/2025 – 10/05/2025

Attendance Monitoring System

Designed and implemented a database-driven attendance monitoring system using MySQL . The system allows secure login for teachers, real-time attendance recording, and automatic report generation. Features include student and course management, daily attendance tracking, and data retrieval through SQL queries. Emphasized normalization, relational database design, and efficient data handling.

15/02/2025 – 30/03/2025

Financial Network Design

Designed a secure and efficient network infrastructure for a financial institution, focusing on reliability, scalability, and data protection. Included topology selection, IP addressing scheme, VLAN segmentation, firewall integration, and secure data transmission protocols. Applied concepts of routing, switching, and network security to ensure uninterrupted and protected financial operations.

05/05/2025 – 25/05/2025

Weather Forecasting System

Developed a full-stack weather forecasting system as part of a Software Engineering project. The system integrates a user-friendly web interface with a backend database to display real-time and historical weather data. Utilized HTML, CSS, JavaScript for the frontend and MySQL for database management. Features include city-based weather updates, forecast visualization, data storage, and admin controls. Applied software engineering principles such as modular design, use case modeling, and system documentation.

05/12/2025 – 20/12/2025

Quiz App

The Quiz App is a full-stack web application designed to conduct interactive quizzes in an efficient and user-friendly manner. It is developed using **HTML, CSS, JavaScript, React.js, Node.js, and MongoDB**. The application allows users to attempt quizzes, view scores, and receive instant feedback.

On the frontend, **React.js** ensures a dynamic and responsive user interface, while **Node.js** handles server-side logic and API management. **MongoDB** is used to store user data, quiz questions, and results securely.

This project demonstrates practical implementation of modern web technologies, including user interaction, data handling, and real-time performance.
